

WALT: divide 2 digit numbers by 1 digit numbers using partitioning.

Example:

$$88 \div 4 =$$

We can partition 88
into 80 and 8.

$$80 \div 4 = \underline{\quad}$$

$$8 \div 4 = \underline{\quad}$$

$$\text{so } 88 \div 4 = \underline{\quad}$$

Add the answers
from the two
calculations
together.

If your child has found this difficult, please practise by giving them examples like these.
